Biodegradable and Compostable

Imperial Bio meets the EN: 13432 standard for use in collecting Green Garden and Food Waste.

Imperial Bio will breakdown using air, moisture and sunlight by natural means. Ensuring the breakdown to be approximately 40 days.

Recycled

We use between 60-100% post consumer waste on our clients approval. We recycle and extrude in the region of 350 tonnes a month at our site in Slough. In some cases we can offer a closed loop supply.

Prime

We also extrude prime materials for food and shrink applications.

Importing

We also import a further 600 tonnes to support our UK manufacturing.

Commercial Waste

We can stop the problem with counterfeiting! With our wide range of ideas and variety of coloured sacks and print you can definitely be sure it will put that personal touch into your product.

Street Cleansing

When we are told from our clients and potential clients that they are determined to maintain clean and uncluttered streets, Imperial Polythene rise to this occasion and supply many waste management and councils with street cleansing bags.

Domestic Waste

Used for household waste. Can be produced in any size, colour and thickness.

Recycling Bags

Everyone is Recycling Mad! To encourage this, Imperial Polythene manufacture bags suitable to hold Glass, Bottles, Cans, Paper, Cardboard. As a safety issue, we usually recommend that the recycling bags are tinted to allow collectors to see what is in the bag.

Domestic Waste

Used for household waste. Can be produced in any size, colour and thickness.
